BUILDING OPERATIONS

SOUTH AUSTRALIA

SEPTEMBER QUARTER 1963

SCOPE This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period July 1958 to September 1963 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in Local Government areas. The information has been compiled from returns collected from all builders of "new buildings".

DEFINITIONS **NEW BUILDINGS:** Additions of £5,000 and over to existing buildings (other than houses) are included, but minor additions, alterations, repairs and renovations, and all construction activity such as rail-ways, bridges, earthworks, water storage, etc., are excluded.

**VALUE:** All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also **COMPLETIONS**). The values shown in Table 4 represent the value of work done on new buildings during the period.

**COMMENCEMENTS:** A building is recorded as commenced when work on the foundations has begun.

**UNDER CONSTRUCTION:** Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

**COMPLETIONS:** A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS Table 1 shows that 3,176 houses were commenced and 2,609 completed during September quarter 1963, an increase of 797 commencements and 30 completions on figures for the previous quarter. Both the number of houses commenced and the number of houses completed were the highest ever; commencements exceeded the previous record (September quarter 1960) by 603 and the previous record for completions (June quarter 1962) was exceeded by 21.

The number of flats commenced (321) was also a record, being 51 more than the previous highest total of 270 in December quarter 1959.

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly the result of the unequal incidence of individual large contracts. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations.

There was an increase of 637 in the number recorded as employed on all jobs of builders of new buildings (Table 6). The total of 13,585 at 30th September 1963 has been exceeded twice only: in September and December quarters 1960, when the numbers recorded were 13,632 and 14,081 respectively.

As shown in Table 7 a large proportion of home building is concentrated within a few local government areas. During the twelve months ended 30th September last 3,877 (73.1 per cent) of dwellings completed in metropolitan local government areas were in the Municipal Corporations of Campbelltown, Enfield, Marion, Mitcham, West Torrens, and Woodville; of dwellings completed outside the metropolitan area 65.8 per cent were in the near-metropolitan District Councils of Munno Para, Noarlunga, Salisbury, and Tea Tree Gully.

1950-1951

1. The first part of the report deals with the general situation of the country in 1950-1951. It is a very interesting and informative study of the country's development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

2. The second part of the report deals with the economic situation of the country in 1950-1951. It is a very interesting and informative study of the country's economic development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

3. The third part of the report deals with the social situation of the country in 1950-1951. It is a very interesting and informative study of the country's social development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

4. The fourth part of the report deals with the political situation of the country in 1950-1951. It is a very interesting and informative study of the country's political development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

5. The fifth part of the report deals with the cultural situation of the country in 1950-1951. It is a very interesting and informative study of the country's cultural development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

6. The sixth part of the report deals with the foreign relations of the country in 1950-1951. It is a very interesting and informative study of the country's foreign relations during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

7. The seventh part of the report deals with the military situation of the country in 1950-1951. It is a very interesting and informative study of the country's military development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

8. The eighth part of the report deals with the conclusion of the report. It is a very interesting and informative study of the country's development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

9. The ninth part of the report deals with the conclusion of the report. It is a very interesting and informative study of the country's development during this period. The author has done a great deal of research and has presented the facts in a clear and concise manner. The report is well written and is a valuable contribution to the study of the country's history and development.

Builders' Labourers	2,183	2,018	1,891	1,905	1,910	1,886	1,756	1,929
Other	2,319	2,312	2,274	2,242	2,475	2,513	2,345	2,451
Total	13,306	12,416	12,346	12,834	13,442	13,338	12,948	13,585

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
